PRESS RELEASE

CONSTRUCTION OF NEW CROSSWALK SLATED TO COMMENCE ON MAY 17TH

Construction of a new decorative crosswalk at the intersection of Lakeview Canyon Road and Agoura Road within the City of Westlake Village is scheduled to begin on Tuesday, May 17. The new crosswalk has been designed to feature a decorative stone walkway with various shades of colors and textures that will be constructed solely out of concrete.

In order to construct the crossings at the four legs of the intersection, the work requires a number of steps including the removal of existing curbs and asphalt; the pouring of the new concrete curb returns and crosswalks; the curing time of the concrete; and the application of grout and several coats of sealant. Due to the nature of the work and in order to keep the intersection open to traffic, only small sidewalk segments can be constructed at any one time over four phases. It is estimated that each phase will require approximately four weeks to complete which means that the overall project will take almost four months from start to finish. During this time, the City of Westlake Village is asking motorists to be patient with the construction work and the occasion traffic delays, and to observe extra caution when approaching and driving through the intersection.

For further information and/or questions concerning this project, please contact John Knipe, City Engineer by phone at 818-706-1613 or by email at john@wlv.org.
