

Senior Citizen DMV Outreach & Call to Action

TAILORED IN-HOUSE SEMINARS, EDUCATION & RESOURCES FOR SENIORS SAFE DRIVING

The DMV has established the Senior Driver Ombudsman Program for the expressed purpose of helping all drivers maintain their driving independence for as long as they can do so safely.

To achieve this goal we will:

- Address specific concerns of senior drivers and provide DMV resources (including education & training)
- Assist as a liaison to ensure senior drivers are treated fairly and consistently when faced with changes in physical, visual, and/or mental abilities.
- Provide information and support to seniors and their loved ones when safety becomes a concern
- Provide outreach seminars for audiences of all sizes

DMV's outreach & senior program is FREE and we come to you!

I would like to take the opportunity of contacting you to determine if you are interested in this invaluable resource. 1 in 5 drivers in the United States is anticipated to be the age of 65 or older by 2030; we recognize the importance of mobility for a good quality of life. Our Senior Driver Ombudsman Program will provide the vital information necessary to represent the interest of public safety in California, while specifically addressing the concerns of our senior drivers. Although all of us will face changes at some point in our lives, getting older does not automatically result in decreased driving skills.

As a call to action, we provide the power of education, resources, and valuable information we have at our command to your constituency. I look forward to speaking with you in the very near future. In the interim, you are invited to visit our website www.dmv.ca.gov for more information regarding the Senior Driver Ombudsman Program.
