PRESS RELEASE

RECONSTRUCTION OF THE LINDERO CANYON/101 FREEWAY OVERPASS TO FORCE TEMPORARY LATE NIGHT AND EARLY MORNING CLOSURES OF 101 FREEWAY

Reconstruction of the Lindero Canyon Road/101 freeway overpass will force a series of nighttime closures for the next two weeks. The southbound 101 freeway will be closed at Lindero Canyon on the Monday and Tuesday's of June 2, 3, 9, and 10. The closures of southbound lanes will start at 8:00 pm with a full southbound freeway closure to occur by 12 midnight each night. This same process and time schedule will be repeated for northbound motorists on the Wednesday, Thursday, and Friday's of June 4, 5, 6, 11, 12, and 13. The 101 Freeway will be fully open by 6:00 am each day.

Southbound motorists will be detoured off the freeway at Westlake Boulevard with northbound vehicles detoured at Reyes Adobe Road. Detour signs will be in place to assist drivers with a return to the 101 freeway. Traffic on Lindero Canyon Road in each direction over the bridge will remain open.

On the first two successive nights and early mornings of the closure starting on June 2, construction crews will be using jackhammers to demolish portions of the overpass as part of the reconstruction project beginning around 11:30 pm. to 5:00 am. Unfortunately, noise

generated by this construction activity may be heard in residential areas adjacent to the work. While the City is mindful of this temporary inconvenience, unfortunately the schedule of work is dictated by Caltrans and the need to undertake this phase of the construction in the late evening and early morning hours is necessary to coincide with the temporary closure of the freeway. Nonetheless, the City wishes to thank the community and affected residents in advance for their patience and understanding associated with this aspect of the project.

To sign up for email and text message updates on the Lindero Canyon/101 freeway overpass reconstruction project, please visit the City's website, www.wlv.org, and click on the blue project update icon on the left side of the homepage. For additional information, please contact City Engineer, John Knipe, at 818-706-1613.
